Text Response
Students with auto-immune disorders like lupus, multiple sclerosis and stuff like that.
I wish Essex County College cared more about it's student's mental health just as much as they cared about tuition payments and putting a price tag on every little service they offer!
Sometimes family members don't want you to succeed. They figure if you continue your education your are better then them. That's not the case you just trying to better your self as an individual.
I was an F-2 status before I change my status to F-1. So, as F-1 status I can't take employment. I am fully depent on my spouse and the three children.
na
My father passed away last year and it's been an emotional year adjusting with this tragic loss. Being a full time student and worker hasn't given me much time to process anything which makes me tired and sad a lot . Also I had surgery and haven't been able to workout which explains gain weight and no exercise question . Thank you
I think that is worry of everyday life which reduces the ability to learn. but I feel good
I have recently been having explosive episodes of anger with my partner along with other emotional inconsistencies and after taking this survey I will certainly take some time into looking into mental and emotional health screening.
Essex County College staff is full of very disrespectful people, but there are a select few who shine above the rest. I wish that everyone who hated their job in Essex wouldn't throw that out on the students who are young and just trying to move forward. However, huge shout outs to Ms.Mendez, my advisor, who has been a delight! She motivates me every time I see her and never makes me feel like I'm a burden....like those in the enrollment services! Hope this can help!!
My emotional and mental issues stem from being a divorced, single mom who recently left an emotional and physically abusive relationship. Finding the time, strength and financial resources have taken its toll. Each day is a struggle. But with patience, the love of my children, my faith and many hours of prayer, I will succeed. I will worry about therapy after I get my degree and a decent job.
"quote or no quote at all, my unanimous friend urges me to caution the attempts at miscellaneous unattentive attempts to actually help persons to perservere to through their present situation no matter the difficulty?!
i wasnt able to answer some questions correctly due to lack of multiple choice options; there where very few however
School is extremely expensive for many students that are full time. Managing both school and work can be very difficult and stressful just to keep up never mind to Excell. AND NOT WORKING TO EXCELL WILL PUT YOU IN A FINANCIAL SITUATION AND ONLY CAUSE MORE STRESS. Something needs to change because students are walking around like zombies and feel weak stressed and unhealthy for the most part.
Most of my anxiety comes from the fact that i have been unemployed. This questionnaire helped me realize that specific reason effected me more then what i thought. Its hard to find a job that is willing to work with your school hours. Financially i am stable because of my family, but if they didn't help me the answers to these question would be completely different. The suicide thoughts all cam to play when i was bullied in school, for the way i looked. Now i don't have those thoughts. Knowing i take 4 classes, and before i got fired i often though of drinking, that never happened too. I have a great support system at home with friends and family. Most of my anxiety comes with life. wanting to graduate, a job, and a place of my own. when you see yourself take two steps back instead of 4 steps forward you begin to question yourself. Thankfully, my parents taught me right from wrong and that things usually really do get better. I cant wait to take the next questionnaire so i can see how far life has taken its course.
None, but this is a good thing to know what college students go through during college life .
cannabis has helped me relax and cope with some of my anxiety and depression issues, however I am a very quiet person so not many poeple know these issues to start with.
I feel that the program provided by the government to help students financially, known as financial aid, needs to be improved. Students take advantage of the money they are given and then people like me who actually need it get nothing based on my parent's taxes because I am under 24 years old even though I receive help from NO ONE. This is why I am forced to work seven days a week.
I don't think i need any mental help. Even though sometimes there are times where not everything is as nice as I would like it to be that does not make me feel depressed, i think those king of things don't affect me in a considerably.
I think that the mental side of this questionare is good because most people ignore mental problems because of the shame or embarssment that comes with it.
i feel that my community college only care about money, never about students well being. They also only show interest to students with financial aid and not students that pay out of pocket because they don't want to loose the governments money. Essex county college never guided me in any way with my career options. I am the first person to go to college in my family, i have a lot of pressure and have no one to guide me. being in this school has been disappointing and a very bad experience. The environment in essex county college is a little bit depressing not motivating. I would love to talk to someone in school to guide and make me feel better but it is all about money to them.
I just feel naturally overwhelmed with my current lifestyle changes that I am trying to make in my life. I sometimes feel anxious and unsure of myself and my future, but feel like I am taking the right steps and focusing properly toward a future that I can hopefully enjoy.
Some questions were just a bit tooo personal.Had it not been for the fact that I could skip and press continue for the questions that I chose not to answer,I would of not continued taking the survey.
I think It's better to give better "real life" selection options. The school is not run properly, I think if the staff was more professional and resourceful more students would graduate from the school. I know it's a community college and not all professors will be grade A but please hire professors that have some integrity. Some of the professors look like you guys hired them off the street. Perception is important, just because the school in an urban area doesn't necessarily means the atmosphere has to feel the same. The school needs a revamping, it needs to be reorganized from the bottom up. Weed out the students that just attend the college to receive refunds, implement harsher stipulation to receive refunds. If they have missed more days than attends, that a pretty good sign that they are not serious about their education. If they have personal issues that let them communicate the issues to the school and provide proof. Usually if a person is in crisis they will want help and will provide the necessary documents to receive the help. Let's start holding people accountable for their actions and teach them how to be better human beings. I know that my life has been difficult because of the poor decisions I have made. I also know that I've made some really great ones. I made the poor ones when I was not feeling so great about myself or situation. Hire people that care, have moral standards, and are good workers and in the long run the college will be more successful and make more money.
some people do not tell relatives or friends about there mental state of mind, in fear of not being a strong person.they hold it in,not even there doctors know because they may fear they are going to a mental hospital
county college must have services for older students-who are trying to be re trained in technology type things-we need help too but get lost in system at times-have same.and issues also/ counselor are over worked-need to hire more/ treat whole person-not just academicy to make college look good
I feel people who are trying to make a second chance at life be considered for counseling upon returning to the educational environment after 20 years of not being in the school setting.
the staff at the school need to improve there attitudes to be more helpful and supportive of students. when asking most of the staff for helpful or assistance with anything, i feel like i'm never a priority and most of the time given the run around to get a problem solved or question answered.
My whole life is all about Jesus. All things work for those who believe in Jesus. It is truth.
Life is hard as hell for the majority. The struggle is beyond what I could ever describe. The help isn't out there Unless you're an immigrant. Go America. The land of the free for everyone except those born here. This survey is bullshit. Nobody really cares.

My parents are not divorced, but separated . I've lived in a dysfunctional home most of my life. I've witnessed domestic violence and alcohol abuse.

No

I feel that Essex County Coillge needs ro rebrand them selves and focus on customer service

I don't mean that my family doesn't give me a lot of support, but I'm just not responsive to encouragement. Also, my friends do try and help, but I wouldn't say that they're successful.

make use of the information

You guys need to conduct a study on PTSD among traumatically injured civilian workers. I was injured at work in 2012 and now academically and socially I have declined in performance. Many pepole tell me that I am different and no longer fun and now I spent most of my time alone. I have spent much of my time worrying about these symptoms that I cant control. I think that there are more people like me in school.

No one really cares

No

It is very hard to find decent help for emotional distress in community college. Compared to a 4 year university which some of my friends go to I feel as if in community college you are on your own and it is very hard to find help. Many times have I had to leave class early because of emotional distress and instead of having someone to talk to inside the campus, I would have to go home and try to get some peace of mind with family around or go to a hospital. I even had to withdraw from this current semester because of mental problems, mainly my bi-polar disorder. I really must finish college not just to help my family get financially stable but to also help myself, I want a career in the future, and I also have debts that need to be paid. But with my psychological problems it is making my expected graduation date take longer, and it is also taking a big toll on my life. If there were mental health counselors inside the campus I would most likely not have to leave school or maybe not even have to withdraw a semester...

There needs to be an option for us to be able to explain why we feel emotion during certain periods. I was waiting for the why and The answer would be we just went through Midterms so im not sure if this effects your data or not but im sure im not alone in my feelings

Not sure how this factors into the research project but our school has a large adult population, so some of the questions really did not apply.

Like many college students and as a mother trying to make a better future for my family its a struggle trying to pay for school and books, but this does not make me want to think of killing myself I still have to see the future and fight for my family.

I really need to have a job and a class scholarship

I am an international student. I am Jamaican I have no clue about my family's mortgage status.. I don't think I need to ask either because they already are providing a place for me to eat so I haven't ask them because I don't want to seem ungrateful and bothersome and I see that has highly disrespectful.. SO I prefer not to. Thank you

It was a very good questionnaire. I want to thank you for doing this. I think it was all - inclusive. I also feel that the care BY SCHOOLS NEEDS A LOT OF IMPROVEMENT. I was unaware of accommodations, and services available to me for a very long time if not for BRIDGEWAY-LEARN program which I will strongly recommend to any student suffering from some disability.

Education for me has become a way to escape and better my life in all aspects. Knowledge is power. Ignorance destroys and corrupts! Nehemiah D. Raynor

Screening to all students to see potential risks

You should ask how others mental health status have affected their own performance.

About various. Professors

nope

My major problem is substance abuse - has been for many years and is the main reason that my life has been put on hold and reason for lost opportunities, failed relationships etc.. The two main reasons that I have not actively sought the necessary long term help that I need is because: 1. I am ashamed of my problems and do not want to come clean to family, friends, school. and 2. I would need to take time off from school to do so, and because I am in an extremely demanding program that follows a particular schedule, I would be forced to drop out of the program and basically re-apply in a year. The worst part of all is that I have been fighting a variety of addictions for over ten years now, and my recurring lack of success has worn me down over the years and discouraged me from trying as hard. Essentially, I feel very hopeless and a large part of my life, including school, is just "going through the motions." I know if I completely give up, there will REALLY be no hope and I will ruin my child's life as well as my own, so I continue to put one foot in front of the other and periodically seek out a solution. During this upcoming summer, I will have a couple of months off and I plan on finding a detox AND short-term inpatient facility that either accepts Medicaid (which is rare and unlikely) or a place that will scholarship my stay. Rehab is not a complete solution - it is a reciprocal relationship, where I only get as much out as I put it - and I have a history of saying "F\*\*\* it" during the process or shortly thereafter, and relapsing. So I have been attending AA meetings and preparing myself mentally for the very difficult process of recovery. Hopefully along with a miracle, I can eventually live a normal life.

IN SPITE OF THE DIFFICULTIES I WAS DEAN'S LIST FOR FALL 2014.As a result, my determination to go further makes the difference.

It's very difficult to be an independent student and work and go to school full time the government does not offer much help if you have no children or dependents

When I am sad or unhappy, I pray and read the Bible. I also sing.

I've suffered from depression in high school. It was never diagnosed because I was embarrassed to ask for help. For many years after high school I abused drugs and alcohol as a means of numbing myself from feeling anything. I have considered suicide in the past. Only after I hit my idea of rock bottom (having an abortion) did I realize I had to change. I started reading self-help type books. Reading about different philosophies and religions also helped much. I can happily say I've come a long way from my dark ages. I no longer abuse alcohol or drugs. I find that daily gratitude allows me to keep myself positive. I still consider myself a sensitive person. I've found that positively channeling my emotions in a constructive manner has been a great and worthwhile challenge. I do feel sad from time to time. However, I feel that I am more aware of myself and my nature. When my behavior is self-defeating or self-sabotaging, I find I recognize the pattern quicker each time. That way I bounce back quickly. It's an uphill challenge and focusing on simply being happy has been worth every effort. I do believe that being happy is a lot of work. I constantly remind myself that it is the best work I will do for my well-being and the well-being of those around me.

The students I got a chance to know show that it takes "us" the students to band together for strength when dealing with any emotion or anxiety of college life.

There is little to none support for mental health for ecc and students do not know how to access them.

Excellent questions - every aspect of mental health was covered.

I have cerebral palsy so it's difficult to get around at times.

I have experienced the death of my brother and the lost of my companion. That is the reasons I have been emotionally upset

I have wife and kid to feed and I'm not making enough to feed the family, it as been difficult for me in school I don't have money in my account I live from pay to pay.

When do I actually sit down and talk to someone
