FOREWARD

This report would be the college's 13th *Excellence and Accountability* report now known as our *Institutional Profile*.

As in the past, this report contains all mandated accountability indicators. These indicators include accreditation status, students served, characteristics of undergraduate students, degrees conferred, student outcomes, faculty characteristics, characteristics of the trustees, a profile of the institution, and public service and major capital projects.

With regard to the data element (students served) during the Fall 2006 semester we served 6,244 full-time students (56.9%) and 4,728 part-time students (43.1%) for a total of 10,972 students. We also served a total of 13,799 non-credit students during 2006 – 2007.

Two important outcome measures continue to be graduation and transfer rates and third-semester (Fall to Fall) retention rates. Our combined graduation and transfer rate for Fall 2003 FTFT degree-seeking freshmen is 11.4(5.0% graduation + 6.4% transfer). The overall third-semester retention rate for ECC is 50.3 percent (slightly down from 59.4 in 2005).

Essex County College continues to increase its number of graduates. During FY 06 the number of degrees and certificates conferred increased from 748 to 825. The largest number of degrees granted was in the Health Professions area followed by Business, Education, Liberal Arts & Sciences, Social Science, Public Administration, and Biological and Biomedical Sciences. Nationally, the college continues to rank high in the number of minority Associate Degrees awarded. According to the July 9, 2007 issue of *Community College Week*, the college ranked 28th (up from 36th last year) in the total number of minority Associate Degrees awarded in 2005-06. Of the FY06 graduates, 31.9 percent took six or more years to graduate. This indicates that the students do “stop out” and often come back to complete their education.

The general enrollment profile of the institution has remained relatively consistent with regard to ethnicity, gender and age. Approximately 53 percent are Black, 21 percent Hispanic, 11 percent White and 4 percent Asian (unknown and other = 11 percent). The male/female ratio continues to be 37 percent male and 61 percent female. Thirty-six (36) percent of our students are 17 to 20 years old and 27.6 percent are 31 or older.

Other information such as retention and graduation statistics for various cohorts are not presented in this report but may be found in the college's annual Fact Book.
